ALA FITNESS ALA TRAIN LIVE ZWIFT KOMPASS

The advertisement features a black indoor cycling bike with a red and black frame. The background is a dark, futuristic space with glowing blue and red lines. A man and a woman are shown in the background, looking at a large screen displaying various cycling metrics like speed, cadence, and power. The bike has a large, illuminated display screen on the handlebars showing a colorful rainbow light effect. The overall aesthetic is high-tech and modern.

6 Colored Heart Rate LED indicator

The indicator changes color according to the heart rate intensity zone, power zone and FTP zone.

With Bluetooth or Ant+ wearable device, heart rate data can be transmitted to the console and displayed on the indicator. This makes monitoring each member's status straightforward and simple!

Bright and clear TFT Console with touch panel and 6-color heart rate indicator on top

Power Zone

LED Indicator	Zone 0 Blue	Zone 1 Aqua	Zone 2 Green	Zone 3 Yellow	Zone 4 Orange	Zone 5 Red	Zone 6 Magenta

Rear wheel lights (7 LED colors followed by Power zones)

Kinomap

Zwift

APP CONNECTIVITY

Compatible with Zwift® and Kinomap® via Bluetooth® and ANT+ connection.

Ergonomic design

Non-slip and comfortable composite handle, four-way handle and seat cushion adjusted to fit the user's body at any time.

The handlebar is covered with PVC coating, and the distance and height of the handlebars and the seat cushion can be adjusted according to the user's body shape, so that users with different body proportions can find the most comfortable riding position.

Professional Power Levels

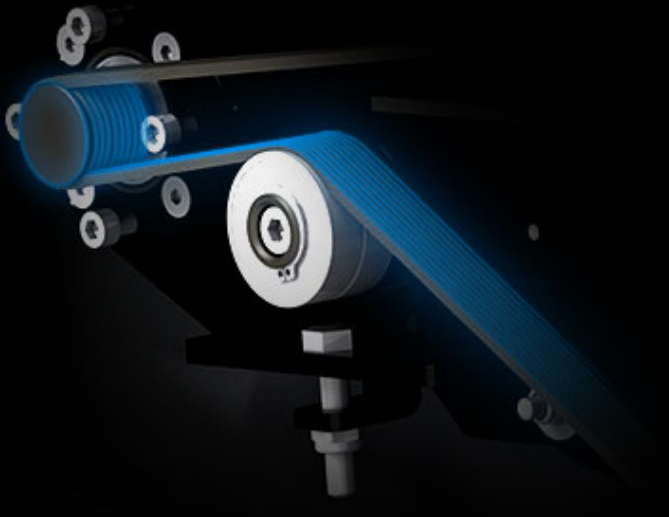

Firefly Training and Indoor Cycle provides easily adjustable resistance up to 20 levels satisfying different training needs.

Users can train with the intervals from 30 watts up to 1,000 plus watts for high intensity and interval training programs.

Quiet and Stable

Smooth magnetic resistance system delivers a well-balanced sensation. Intricate flywheel and smooth magnetic resistance system delivers a stable and quality ride. With no friction parts to wear and tear on resistance levels and brakes, Firefly is extremely durable for group cycling and requires very little maintenance.

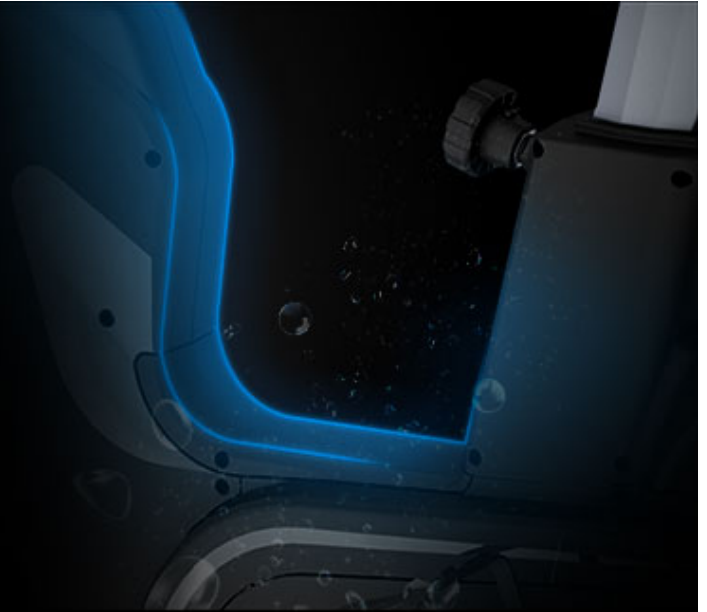

POLY-V Belt Drive

POLY-V 8PK belt transmission is quiet, comfortable, and smooth without slipping.

Covered Design — Safe and Durable

Fully covered flywheel and steel structure prevent sweat erosion and accidental contact to keep the user and surrounding personnel safe.

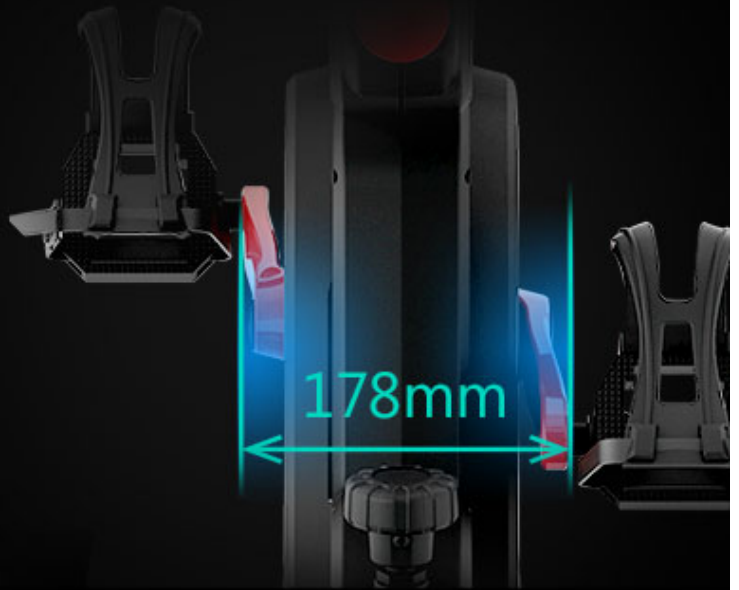

Professional VELO Saddle

Streamlined design for comfort and shock absorption.

Q-Factor

178mm Q-Factor

SPD Compound Pedal

Suitable for both professional cycling shoes and sports shoes.

Transportation Wheels

You can move your bike easily and conveniently.

4 Strong Stabilizers

Stable cushioning to ensure steady rides, adjustable for different platforms and surfaces.
