COMMERCIAL 10 PAIRS VERTICAL DUMBBELL RACK

SKU: OK0017A-1

PRODUCT DESCRIPTION

COMPACT SIZE

A strong and durable frame can hold up to 10 pairs of dumbbells. The vertical design allows you to save space and provide a solution for storing your dumbbells neatly. This way you will make sure that your equipment is always in one place while not in use and make it easier for users to choose the weight, as they can be organized accordingly.

FUNCTIONAL DESIGN

Cradles are covered with a protective material that prevents surface chipping on your dumbbell handles and scratching of knurling. Cradles are also conveniently angled for easier dumbbell placement or removal. These features ensure fast resistance changing in between reps and protect your equipment for maximum longevity.

Suitable for Hex dumbbell up to max 25kg.

MAIN ADVANTAGES

- Front facing storage
- Protective coating
- Stable, vertical construction
