- 2 x 90kg weight stack
- Off-the-floor base

This is a world first for Folding Home Gym Smith Machine. All-In-One Functional Trainer upgrade to the fitness Solution.

The smith machine

The pulleys

The stacks

The CUBE utilizes high quality 25mm self-aligning linear bearings to achieve the smooth, secure movements a smith machine needs. Change weights easily with the built in weight stack.

Dual, heavy duty swivel pulleys on the front rack form an essential component of this machine. A fixing point for the many attachments included with the CUBE, there is little you cannot perform with this cable system.

2 x 90kg precision cut steel weight stacks allow the user to increase strength over time with 22 weight increments. These easy to access, pin select weight stacks add ease for quick-changing supersets, multiple users and much more.
