HG AIR RUNNER MINI MANUAL TREADMILL (ZONE 2 RUNNING)

SKU: AIR-RUNNER-mini

PRODUCT DESCRIPTION

Air Runner Mini

The Curve Treadmill Purpose-Built for Zone 2 Running. Compact, foldable, knee-friendly, and optimized through a full year of prototyping and testing to create the perfect running experience.

Tech Specs

Engineered Specifically for Zone 2 Running

The right curve. The right length. The right effort.

Optimized Curve Geometry

Most curved treadmills are designed for sprinting or high-intensity workouts. Air Runner Mini is different.

We spent over 12 months prototyping, testing, and refining the curve gradient to create the most comfortable running experience for Zone 2 training.

The result is a natural stride that allows you to maintain steady aerobic effort without constantly fighting against the treadmill.

Perfect Zone 2 Effort

Comfortable resistance for long aerobic sessions.

Natural Running Form

Encourages efficient stride mechanics.

Consistent Pace Control

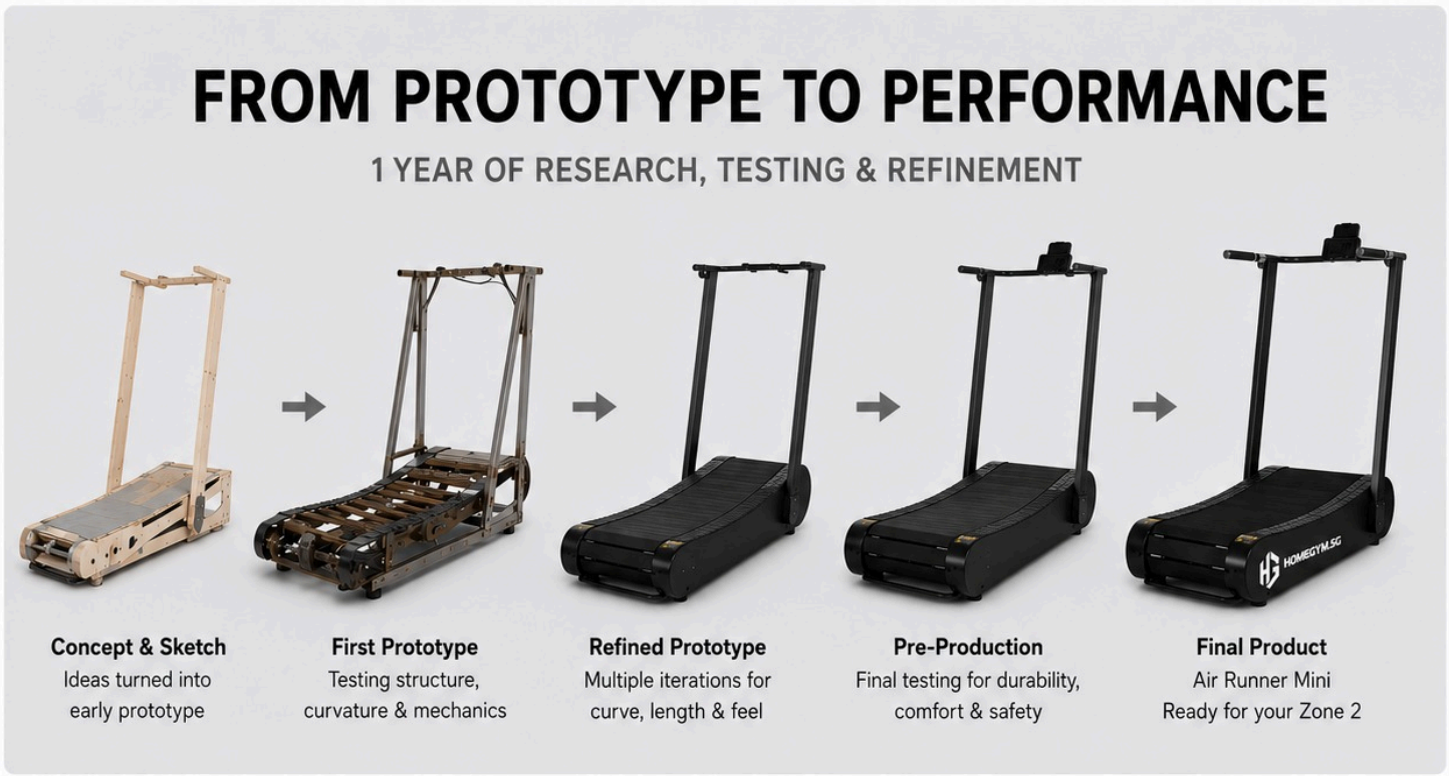
Smooth speed adjustments help runners maintain a stable Zone 2 heart rate.

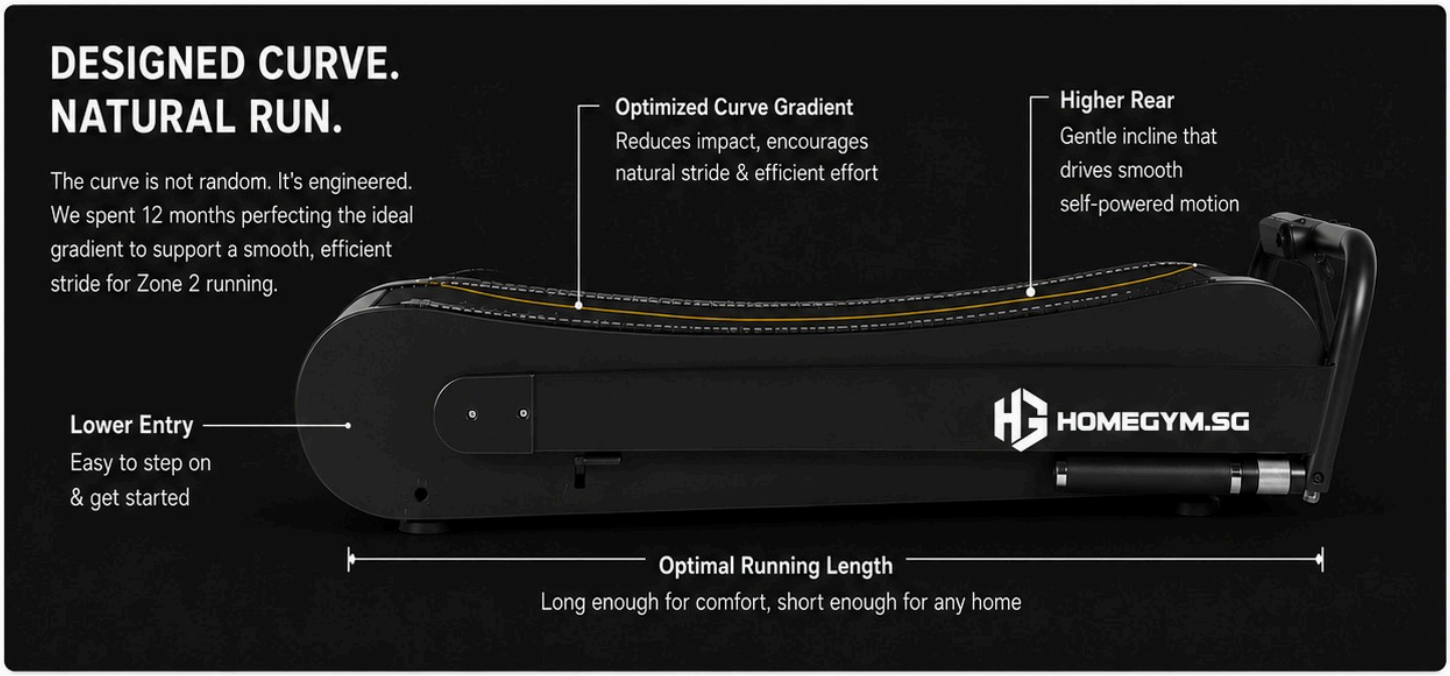
Suitable for Asian Users

Running deck length carefully designed for most Asian body sizes.

Designed & Developed Through Real Testing

Every dimension was intentionally chosen.





One Full Year of Development

Air Runner Mini wasn't created by copying existing curved treadmills.

We spent an entire year evaluating different deck lengths, curve gradients, running feel, and user feedback before arriving at the final design.

Many treadmills are either too short and unstable, or too large for modern homes. Air Runner Mini strikes the perfect balance.

Optimized Curve Geometry

Multiple curve profiles were tested before arriving at the ideal gradient for smooth Zone 2 running.

Not Too Long

Fits comfortably into Singapore apartments and homes.

Not Too Short

Maintains stability and confidence during running.

Foldable Design

Store away easily when not in use.

Built for Comfortable & Entertaining Runs

Everything you need for enjoyable daily training.

Smart Features Without the Complexity

Air Runner Mini combines the simplicity of a manual treadmill with the convenience of modern training tools.

Track your workouts, stay entertained during longer runs, and connect to popular fitness platforms without the noise, maintenance, or power consumption of a motorized treadmill.

Battery-Powered Monitor

Displays key workout metrics including speed, distance, running time, calories, and more.

Integrated Phone Holder

Securely mount your smartphone to watch shows, follow workouts, or listen to entertainment while running.

Zwift & Kinomap Compatible

Connect with popular fitness apps to make indoor running more immersive, interactive, and motivating.

Quiet Manual Operation

No motor means significantly less operating noise, making it ideal for homes, apartments, and shared living spaces.

Why Choose Air Runner Mini Over Electrical Treadmills?

- **Air Cushion Running Surface**
  Better shock absorption helps reduce impact on knees and joints compared to many traditional treadmills.
- **100% Manual Powered**
  You control every step naturally. No sudden speed changes and no motor pulling your pace.
- **Safer to Use**
  Simply slow down to stop. The treadmill responds instantly to your movement.
- **Run With Socks**
  Great for indoor cleanliness. No shoe dust, dirt, or outdoor debris brought into your home.
- **Activates More Running Muscles** The curved design encourages natural propulsion, engaging glutes, hamstrings, and calves more effectively than many conventional motorized treadmills.
- **No Electricity Required**
  Lower running costs and freedom to place it anywhere.

Train Smarter. Run Longer.

The first curve treadmill designed around real-world Zone 2 running.

Whether you're improving cardiovascular fitness, building endurance, losing weight, or training for longevity, Zone 2 running is one of the most effective forms of exercise.

Air Runner Mini was built specifically to make Zone 2 training comfortable, sustainable, and accessible from home.

Compact enough for Singapore homes. Comfortable enough for daily use. Engineered through a full year of testing.
