

IRONMASTER IM2000 SELF SPOTTING SYSTEM

SKU: IR-IM2000

PRODUCT DESCRIPTION

Why is this machine the best for your home gym:

1. Most compact with most features, which include smith, lat pulldown, low row, cables exercise, weight storage
2. Even for users who prefer free weights, there is add on option for bar and safety catches which makes the machine similar to a half rack
3. In addition to second point, the smith machine part can be used for exercises such as calf raise.

The Ironmaster IM2000 self-spotting system is our latest generation design with over 25 years of proven performance. The Ironmaster lifting bar is non-binding and friction free no matter how much weight you want to use. The exclusive plastic on plastic sliding system is quiet and only requires clean to the touch silicone spray lubricant. The action is truly amazing! This machine is the ultimate personal training center that is compact, offers an unlimited variety of exercise to work every muscle group and does it all in complete safety. Thousands of our customers will testify - Ironmaster is the best you can get.

Features

- **Patented Self-Spotting Lifting Bar System** Has Lockout holes 1.7" apart so you never get stuck when working out alone. You can push yourself to the limit for maximum muscle building.
- **Super heavy duty** Structural steel frame for the ultimate in strength and stability. 1,000 lb load capacity!
- **Secondary safety stops** And heavy duty springs provide a backup when the lifting bar is not under hand control.
- **Better than any smith machine** With no binding due to our patented slide rail and bushing system. Ergonomic lifting bar locks out forwards instead of backwards for a much faster and more natural movement. The light weight lifting bar needs no complex counterweight system.
- **Incredible space saving design** Full size, for the serious weight lifter. Takes up much less room than a cage, Smith, or leverage machine.

Base model includes the following standard equipment: Main frame, lifting bar with Olympic adapters, standard plate holders, lat pull bar, upper and lower pulley/cable system. Super Bench and attachments sold separately or in packages. Dimensions are 48" wide x 48" deep, x 84.5" high. We recommend about 7 feet wide x 5-6 feet deep for use and minimum of 87" ceiling height. The lifting bar is 73" Wide and weighs 36 lbs with the included Olympic Sleeve Adapters and 32 lbs without them. This unit is very space efficient! Weight Capacity for the lifting bar is 1000 lbs and the cable system is rated for 350 lbs.
