## KEY FEATURES

### BUILT TO LAST

When we set out to design the AssaultBike, we knew that the integration of sealed cartridge bearings in every pivot and moving part was an absolute necessity. So we were more than shocked when the count ended up totaling twenty. That's twenty sealed-bearings in all...tucked and hidden neatly away under machined and formed steel.

- 20 Sealed-Bearings In All
- Heavy-Duty Steel Frame
- Industrial Powder Coating
- Reinforced Pedals and Cranks

### THIS CONSOLE DOES NO CONSOLING

We don’t believe in a “one size fits all” workout, which is why we created one power-house machine that can be tailored to fit your specific goals. From endurance and stamina training to HIIT and Tabata, the AssaultBike provides a variety of calorie-torching workouts. Choose from one of our seven on-board programs or design your own workouts based on calories, distance, time or heart rate.

1. Total Body Workout
2. Infinite Intensity + Resistance
3. Easy-To-Use Console with Multiple Onboard Features

## LOW MAINTENANCE DESIGN

Whether your training happens in the gym, garage, or your living room, the AssaultBike's compact and convenient design makes it easy to use anywhere. With integrated transport wheels and four adjustable stabilizing feet, moving and storing the AssaultBike is effortless. The fan-resistance design and battery-powered console also means that it's 100% operated and powered by YOU. No messy cords or outlets required.

4. Easy-to-Assemble
5. Zero Carbon Footprint
6. Tested In All Environments

Designed by a dedicated team of fitness engineers with a consistent stream of feedback from enthusiasts, club owners, trainers and physical therapists, the Assault is truly the best-in-class fan bike available today. Built from the ground up, we started with a frame manufactured from full high-tensile steel that is sealed with a layer of industrial powder coating paint. To ensure durability and long periods of maintenance free use, all moving parts employ sealed cartridge bearings.

The Assault AirBike console offers a crisp LCD screen that is packed with features for all users. On-board programming allows you to jump into a workout with minimal fuss, or fully customize your session on the bike. Choose from high intensity intervals, or set a target distance or Watt goals. Integrated messaging to help inspire you keeps the workout fresh and motivating.

No two athletes are the same and personalizing a piece of equipment to match an individual’s ability and strength is nearly impossible. The Assault workout meets this challenge by ramping up resistance automatically as you push, pull and pedal with greater speed and force. In fact, the Assault can provide a virtually unlimited workout. Keep it mellow and level to target a heart rate range, or jump into a Tabata/high-intensity interval session that reduces you to a quivering heap of sweat. The Assault offers individualized and infinite adjustments for an unlimited workout. Let the Assault AirBike be the primary tool in your calorie-burning tool kit.

ADDITIONAL INFORMATION

More Information
