

BODYX BK-3033 FREE MOVE 2D SMITH MACHINE

SKU: BK-3033

PRODUCT
DESCRIPTION

The BK-3033 moves both vertically and horizontally, allowing for a more natural, user-defined motion. Because the body's natural movements can be utilized, all free-weight exercises can be performed. The horizontal motion can also be locked for conventional "Smith Machine" type exercises.

- Hooks and safety spotters travel with you
 - Natural lift off and re-rack
- Can be locked for traditional Smith Machine exercises
 - Includes Multi Grip Chin-Up Bar

BODYX FREE MOTION PRO SMITH

UP

DOWN

LEFT / RIGHT

360 ROTATION

MOVE FREE SMITH

**ADVANCED
BEARINGS!**

Free Move or Multiple locking positions to suit different exercises. Easily lock and unlock with adjustment pin.

Bench Exercise

Shoulder Press

Incline Press

Flat Press

Decline Press

Exercise

BARBELL SQUAT

FRONT SQUAT

This causes the quadriceps to work harder than the hamstrings and requires extra core strength to keep an upright position compared to the back squat.

CABLE LINKAGE

LATPULL DOWN

Optional module pulley system to link with the smith machine. Make use of the weights on the smith bar to perform various cable exercises with lat bar, tricep rope and many other attachments. Attachments sold separately.
